

ADJUSTABLE PITCH ANCHOR

A reliable anchor and personal fall arrest system are a roofer's best friend. Working at heights is a dangerous job and you should be able to fully trust your equipment. The Malta Dynamics Adjustable Pitch Roof Anchor is just what you need to get to work quickly and safely. The anchor is designed to be lightweight and durable enough to bend over the peak of the roof or flattened to match the pitch of the roof.

Efficient safety measures are helpful when you work at heights, and the adjustable pitch anchor features a quick installation process that can be done in minutes. Simply attach the anchor to the roof using 8, style 16d common nails. Remember to locate the crossbeam on the roof before you anchor down. Your anchor is only as strong as the surface you attach it to, so make sure it's sturdy. We made these anchors user friendly and surface friendly, they are removable and leave no lasting damage to the rooftop.

KEY FEATURES

1. Pre-punched attachment holes for nails (x8)

- Lightweight and durable design
- Can be easily bent to match the pitch of the roof
- Removable and leaves no damage

PERFORMANCE SPECIFICATIONS
