

RESTRAINT LANYARD

Malta Dynamics Restraint Lanyard easily adjusts from 4 to 6 feet, offering flexibility for use in positioning and restraint. This restraint lanyard is ideal for use in bucket trucks and lifts to prevent the possibility of a fall. The restraint lanyard attaches via snap hook or carabiner to the back D-Ring on a full body harness or restraint belt. The durable 1" polyester webbing has a tensile strength of 9,800 lbs., is UV resistant, and includes a durable label protector. This restraint lanyard meets or exceeds the requirements of OSHA 1926, OSHA 1910 and ANSI Z359.3.
