

# MICROWAVE BLIND SPOT SENSOR SYSTEM

## RVS-122

REAR VIEW  
**SAFETY**

A Safe Fleet Brand

- Perfect for blind spots on RV's
- Aural and visual alerts
- Microwave Technology accurately detects objects in blind spots
- Mounts easily without drilling
- Includes GPS Module

Finally, a blind spot sensor system specifically designed for RV's with no drilling or complicated installation! Simply place the microwave sensors behind the side panelling on your RV. The system will give visual and audio alerts when an object enters the blind spots slightly behind and to the side of the vehicle. While there will always be visual alerts, audio warnings will only trigger if the turn signals are on. The sensors improve overall safety and increase driver confidence.
