

7.3" Rear View Mirror Monitor with MirrorLink

RVS-718-7ML

The RVS-718-7ML 7.3" Car Rear View Mirror Monitor with MirrorLink is the next step in mirror monitor technology. The mirror link enables you to view your mobile phone on your mirror monitor through WiFi and standard programs like DLNA, Miracast and Air Play. Navigate your trip, select and listen to music, or play games on your mirror monitor, all with your cell phone! Your backup camera will automatically display on your monitor when you reverse.

The RVS-718-7ML also features a highly reflective OEM quality 7.3" inch screen with adjustable grid lines. Automatic brightness adjustment gives the driver a clear image regardless of harsh or weak light conditions. 3 video inputs allow you to connect 3 cameras to the system simultaneously. Easily switch between multiple displays including 3 full camera displays, a full mirrorlink display, and multiple dual displays. The RVS-718-7ML is a superior rear view mirror, a high quality screen for backup and side cameras, and a large display you control with your cell phone.

-  Color mode adjustment

Remote controller

MirrorLink

The mirror link allows you to project your mobile phone to the rear view monitor through a WiFi connection and standard programs like DLNA, Miracast and Air Play. Navigate, listen to music, etc. on your rear view monitor, all with your phone.

Backup camera display

When the vehicle is put into reverse, the monitor will automatically display the backup camera with grid lines. These grid lines can be adjusted manually using your remote.
