

AIR AIRSHIELD PRO AIR HOSE

FEATURES & APPLICATIONS:

- General purpose air & water hose, engineered for medium applications | Limited Oil Resistance

NOTES:

- Do not use this hose on an air compressor unless you attach a whip hose to the end of it.
- A whip hose should first be connected to the air compressor and then connected MPH hose. If you do not use a whip hose the heat from compressor will cause hose to bubble the first four feet.
- The flexible air compressor hose that connects to the compressor are referred to as "bull" or " whip" hoses, typically a wire reinforced rubber hose with an oil- resistant tube and an abrasion-resistant cover. These rubber hoses work quite well for most compressed air applications.

TECHNICAL DATA:

- **Temp Range:** +15° F to +150° F
- **Cover:** Red/Blue, PVC/Rubber compound
- **Tube:** Black, PVC compound RMA Class B
- **Reinforcement:** Spiral polyester braiding
- **Safety Factor:** 3:1 min
- **Branding:**

TUBE: BLACK EPDM / SBR
