24VDC Power Supply with DIN Rail Mount

24VDC Power Supply

This 24V power supply is capable of providing up to 2.5 Amps of output current which can be used to power sensors, 4-20mA current loops, or other controls. The DIN rail mounting saves space in tight enclosures. It also features high efficiency, a wide input voltage range 88-264VAC, and UL approvals. The power supply is protected against over voltage, over load and short-circuit conditions.
